

CITY OF NEW ORLEANS

BROADMOOR STREETSCAPE PROJECT General Pershing Street from South Broad Street to South Miro Street

A streetscape is a public improvement project that enhances the public area and triggers subsequent recovery and investment in surrounding neighborhoods. This development is designed to help create additional and continued private investment in the City's key recovery areas. There are a total of 24 streetscape projects currently underway or planned in the City of New Orleans.

The scope of work for this project includes:

- Re-surfacing of the asphalt road
- Planting of new trees
- New crosswalk markings
- New curbs
- Wider sidewalks
- Americans with Disabilities Act (ADA)-compliant ramps at sidewalk corners

The Broadmoor Streetscape Project is estimated to be completed this coming winter. During construction, residents can expect to experience temporary construction inconveniences such as limited access to areas within the construction zone, movement of heavy equipment, safety signage, fences and sounds.
